Ask Doctor Global Change (Service of U.S. Global Change Research Information Office)

<http://gcrio.custhelp.com/cgi-bin/gcrio.cfg/php/enduser/home.php>

Winner of a 2002 Exemplary Service Award, bestowed by the Virtual Reference Desk, Dr. Global Change is "a reference service that offers assistance in finding data and information on global environmental change." Anyone with Internet access and a need for information on related to global change may ask for help, and staff of the U.S. Global Change Research Information Office (GCRIO) office and other agencies provide the service. The GCRIO provides access to data and information on climate change research, adaptation/mitigation strategies and technologies, and global change related educational resources on behalf of the U.S. Global Change Research Program (USGCRP) and its participating Federal Agencies. The Center for International Earth Science Information Network (CIESIN) at Columbia University operates the GCRIO with funding from NASA.

Biodiversity 911 (Saving life on earth)

<http://www.biodiversity911.org/>

This web site provides supporting materials for a traveling exhibit developed by the World Wildlife Fund and funded by the National Science Foundation. From Sept. 25, 2002, to March 15, 2003, the exhibit will be displayed at the National Geographic Society headquarters in Washington, D.C.; from October 1 to December 31, 2002, it will be at the Houston Zoo in Houston,

Texas. This educational web site presents activities to illustrate the meaning and importance of biodiversity such as interactive games and video clips which are organized in categories by topics including: biodiversity basics, wildlife trade, climate change, soil, forests, fisheries, and toxics.

Black Rhinoceros: A Green Activist's Resource

<http://www.blackrhinoceros.org/>

This web site is a directory to more than 350 organizations concerned with environmental topics. The introduction to the site boasts that it provides, "hundreds of cross-referenced and regularly updated links to biodiversity, conservation, energy, environmental justice, habitat, and pollution." Provides links to news briefs, or "green alerts," on several topics. E-MAIL: info@blackrhinoceros.org

DevNet Jobs (Gateway to Jobs in the International Development and Environment Sectors)

<http://www.DevNetJobs.org/>

Updated daily, this site lists job openings and offers a weekly e-mail service of new job listings. Contact: Jessica Matthews, Remote Extension Team, DevNetJobs.org, E-MAIL: jobs@devnetjobs.org

eeBuildings (Energy-efficient buildings)

<http://www.epa.gov/eeBuildings/>

The United States Environmental Protection Agency (EPA) provides this resource for energy efficiency in developing countries. Building owners and managers may use this site to tap into EPA information on energy efficiency. The site presents the Energy Star Benchmarking Tool, a program to measure the total energy consumption of a building as it compares to similar buildings. EeBuildings conducts in-country programs for training, including retrofitting buildings in Manila, Philippines and Shanghai, China. E-MAIL: eebuildings@epa.gov

Eco-Portal (Online source for environmental and sustainability information)

<http://www.eco-portal.com/>

This busy-looking web site offers a search engine and topic directory for information and news headlines arranged by broad categories such as sustainability, air, water, ocean, land, and regions. Glen Barry, President of Ecological Enterprises, Inc. of Madison, Wisconsin, maintains the web site and acknowledges support of the European Commission for site sponsorship.

Environmental Federal Register Summaries (Massachusetts Dept. of Environmental Protection)

<http://www.state.ma.us/dep/bspt/wes/fr/frhome.htm>

This site provides a weekly report on notices published in the *Federal Register* on environmental topics. The web site is organized for easy access by topic, with subject divisions such as: water, wastewater, air quality, hazardous waste, pesticides, fish and wildlife. Text summaries link to the full-text notices in the *Federal Register*.

Environmental Frontlines (Information source on environmental issues)

<http://www.envirofront.org/>

Environmental Frontlines (EF) is "an independent, non-profit organization focused on tracking and reporting on key current issues in the environmental arena and related areas (e.g., agriculture, energy, public health, transportation)." EF has published a directory called *The Environmental Guidebook*, which profiles nearly 500 key organizations and other entities actively engaged in environmental issues and related activities in the United States and beyond. The EF website provides a gateway to all the organizations described in the *Guidebook*, and offers an Issue Reference Library on current topics of concern. EF is also actively involved in select issues, particularly environmental education at colleges and universities.

Fuel Cell Today

<http://www.fuelcelltoday.com/index/>

This web site calls itself a global portal about commercialization of fuel cells. Sections of the site offer news articles, a media kit (with images, facts, and figures), glossary, discussion boards, directories of people and companies, patents, and job listings. Readers may register on the site to subscribe to an electronic newsletter. Geographic emphasis is on the United States and United Kingdom. Published by Johnson Matthey, PLC, a chemical company involved in the industry. [Adapted from an item, copyright 2002, by Librarians' Index to the Internet, lii.org.]

LCITA (Independent Media Production on Social, Cultural, and Environmental Issues)

<http://www.lucita.net>

This media company claims to be "dedicated exclusively to the development and production of media content and platforms that educate and engage audiences in the social, cultural and environmental issues of our times." Producing both in-house and client-driven projects, LUCITA employees aim

to use media platforms to their fullest creative potential. LUCITA has worked with NGOs, businesses, and individuals and is open to broad collaboration. The company is a member of the [United Nations Global Compact](#), a voluntary initiative for businesses engaged in sustainable development, corporate social responsibility and other issues. Contact Birgitte Rasine, E-MAIL: lacontessa@attglobal.net.

National Environmental Methods Index (NEMI) (from the U.S. Geological Survey)

<http://www.nemi.gov/>

This searchable database is designed to "allow scientists and managers monitoring water quality to compare data collection methods at a glance and find the method that best meets their needs. The tool also allows monitoring data to be shared among different agencies and organizations that use different methods at different times." The Methods and Data Comparability Board, a partnership of water-quality experts from federal agencies, states, tribes, municipalities, industry, and private organizations directs NEMI development.

Ocean Biogeographic Information System (OBIS)

<http://www.iobis.org/>

This web site is designed to support research on relationships among species and their environment. Oceans represent over 90% of the world's habitable space, but few habitats of individual ocean-dwelling species have been described in precise geographic terms. The site offers access to global information, referenced by geographic detail on accurately identified marine species. This web site integrates access to discrete databases containing biological, physical, and chemical oceanographic data on a selected species and geographic areas of interest.

The Recycling Site

<http://www.therecyclingsite.com/>

This web site reports on market price for various types of waste and offers sections containing information about associations, conferences, educational resources, publications, materials exchange, and legislative policy pertinent to recycling. Launched in August 2002, the site promises to be updated daily with editorial and directory services supporting consumer and commercial interests.

Renewable Natural Resource Foundation (RNRF)

<http://www.rnrf.org/>

Follow the link to "Internships/Education" from the toolbar at this web site to find resources for students interested in natural resource internships in the federal government as well as with natural resource societies. The RNRF lists educational opportunities at more than 1,000 schools and provides tools students can use in selecting higher education institutions. Career information describes fields in natural resources students may want to learn more about as they consider their educational plans.

Sprawl City (Consumption growth and population growth)

<http://www.sprawlcity.org/index.html>

This web site was created and is maintained by environmental authors, Leon Kolankiewicz and Roy Beck with the intent "to help the public make more ready use of federal data on sprawl and rural land loss." The authors use data from the U.S. Bureau of the Census, which they analyze and present in the forms of charts, graphs, and definitions of terms. Members of an extensive advisory board guide the web site's development.

Terms of Environment

<http://www.epa.gov/OCEPAterms/>

The U.S. Environmental Protection Agency produces this glossary of environmental terms. This site defines words that appear in EPA publications, news releases, and other agency documents. Abbreviations and acronyms are included.

National Image Library (Wildlife photographs from the U.S. Fish and Wildlife Service)

<http://images.fws.gov/>

Over 2,000 photographs in the public domain (copyright-free) are digitized, organized in a searchable database, and available for free downloading. Lower resolution images are scanned at 150 dpi, suitable for 5x7 inch prints; higher resolution is about 400 dpi and appropriate for up to an 8x10 inch format. Search by subject, location, or photographer. This collection provides access to a comprehensive collection of pictures of waterfowl and wildlife species, as well as shots of wildlife habitats. Additional images present wildlife management and scientific field activities.

Children's Painting Competition (United Nations Environment Programme)

(UNEP))

http://www.unep.org/children_youth/kids/painting.htm

Although this announcement may come too late for participants to enter art work this year (entries must be received by January 11, 2003), see this web site for information about an annual competition sponsored by the UNEP Children & Youth program. Winning paintings are used to develop posters, annual calendars, a picture booklet, and for international exhibitions. The theme for 2002/2003 is Save the Earth: Preserve the Beautiful Oceans, Skies and Forests for the Future. Prizes will be awarded for the best 500 entries. Contact: Jim Sniffen, Information Officer, United Nations Environment Programme, TEL:1-212-963-8210, E-MAIL: sniffenj@un.org.

Europe (European regional portal of the United Nations Environment Programme (UNEP.Net))

<http://europe.unep.net/>

The European Portal is the first regional section of the UNEP.Net Web site. Text on the site explains that the "goal of the European Regional Portal is to make available the best existing sources of information on the European environment at regional, sub-regional, and national levels," with an aim to support "improved environmental management and related decision-making." Provides information on problem issues and links to graphics, data sets, and background material on topics such as agricultural reform, air quality, genetically modified organisms, urban areas, and water pollution. Contact: Jaap van Woerden, GEO & Earthwatch Data Coordinator. Address: UNEP/DEWA/GRID-Geneva, TEL: (41-22) 917-8169 / 8294; FAX: (41-22) 917-8029, E-MAIL: woerden@grid.unep.ch

European Society for Environmental History (ESEH)

<http://www.eseh.org/>

This society was founded in 1999, and text on the site explains its purpose is, "to promote environmental history in Europe, by encouraging and supporting research, teaching and publications in the field," and to "stimulate dialogue between humanistic scholarship, environmental science, and other disciplines." Contact: Jan Oosthoek, E-MAIL: k.j.w.oosthoek@phil.uni-goettingen.de or send items to be included on the web site to: Sofia Åkerberg, E-MAIL: sofia.akerberg@histstud.umu.se

World Environment Map

<http://www.earthsystems.com.au/mapworld/index.htm>

Available for purchase from this web site, this map (130cm x 90cm) presents a view of the world's environment with 50 charts and tables and more than 400 sites labeled for their environmental significance. The map was produced by Earth Systems, an Australian environmental research and consulting group in Melbourne.
