

# Table of Contents

## Features

|  |         |
|--|---------|
| Mapping Out the Brain: PET Scans and the Structure of the Brain - <b>Crystal Xu</b> .....                | Page 4  |
| How to Create 2D Materials - <b>Phillis Wan</b> .....  | Page 6  |
| Utilizing STORM Microscopy for Illuminating Parkinson Diseases Mechanisms - <b>Emma Bi</b> .....         | Page 16 |
| Transcranial Magnetic Stimulation and the Attentional Network in Depression - <b>Gardenia Chang</b> .... | Page 20 |
| Skeletal Editing: Chemistry's Next Frontier - <b>Nykita Rustad</b> .....                                 | Page 24 |
| Deep Sea Mineral Mining: Impacts on Marine Ecosystems and Climate Change - <b>Isabelle Cherry</b> ....   | Page 32 |
| Nanomaterials in Regenerative Dentistry - <b>Varsha Raju</b> .....                                       | Page 38 |
| Matured Milky Ways in the Infant Universe - <b>Ellie Mak</b> .....                                       | Page 46 |
| The Search for Sustainable Biofuel - <b>Marcela Perez</b> .....  | Page 50 |
| The Feasibility of Radically Translating Alien Language - <b>Logan Roscoe</b> .....                      | Page 54 |
| Rare Earth Nanoprobes In Revolutionizing Breast Cancer Surgery - <b>Sania Moghe</b> .....                | Page 58 |
| Protecting Innovation - <b>Andrew Delaney</b> .....  | Page 65 |
| Efflux Pumps: Current Targets in the fight against Antibiotic Resistance - <b>Malia Wilson</b> .....     | Page 68 |

## Interviews

**Expansion and Exploration: A Deeper Look into Hubble Tension, Supernovae, and Other Stellar Mysteries** Page 6

*An Interview with Professor Alex Filippenko*

By: Grace Zhou, Erica Pan, Smridhi Mahajan, and Tanya Sanghal

**Deciphering the Speech Code: Giving a Voice to Paralyzed Patients** Page 27

*An Interview with David Moses*

By: Aneesa Mustafa, Carlyn Leavitt, Sania Choudhary, and Tanya Sanghal

**From Toothpaste to Tumors: How AMG 510 Is Revolutionizing Cancer Therapy** Page 42

*An Interview with Margaret Chu-Moyer*

By: Ana Sofia Brito, Tiana Gao, Ella Kaufman, Andrew Delaney

**Innovation at Intersections: Enhancing Public Systems with AI** Page 61

*Interview with Professor Michael Jordan*

By: Lara Potgieter, Ann Palayur, and Andrew Delaney

## Research

**The search for weak crustal magnetic fields on Mars using solar energetic electrons observed by the SEP instrument on-board the MAVEN spacecraft** Page 73

Ish Malik

**MAJOR, YEAR, DEPARTMENTAL:** Physics, 2023, Space Science Laboratory
