

E D I T O R ' S N O T E

Dear Reader,

I am pleased to introduce Berkeley Scientific's thirteenth volume. Berkeley Scientific has been present for many years, publishing undergraduate research, interviews with distinguished professors, and features articles about a variety of topics. We are excited to present our newest issue, which hosts a range of features articles exploring a topic that is continuously exciting and developing, Human Interaction with Technology, as well as the number of terrific research papers by UC Berkeley undergraduate scientists that we present to you.

In addition, we are pleased to make our way onto the web with a new transformed design, that is now comprised of an abundance of amazing colored graphics. We hope that this new look coupled with the great writing in our journal makes for an enjoyable and informative read. The staff has put an enormous amount of effort in this issue, and we hope that it is worth the wait.

We would like to thank Dr. Tyler Stovall, Dean of the Undergraduate Division of the College of Letters and Science, for providing us with the resources to produce a quality journal. The staff also gives thanks to Leah Carroll and Terry Strathman, our department advisors, for their constant guidance and assistance throughout the semester.

We appreciate your support of Berkeley Scientific Journal, and we welcome any suggestions that may further improve the quality of our journal.

Dave Garg
Editor-In-Chief
