Madagascar has over 5,000km of coastline with more than 500,000 people depending on coastal and marine resources for their livelihoods. Nonetheless, geographical isolation characterizes the majority of these coastal communities.

The first locally managed marine area (LMMA) in Madagascar was created in 2015. Madagascar took the step towards the empowerment of local communities to take and implement decisions about the use of their resources. Since then, the adoption of this approach has been expanding within communities, governmental authorities, and organizations working in marine and coastal conservation.

In June 2012, the first forum brought together representatives from 18 LMMAs. The **MIHARI** network was established as an outcome of this. MIHARI is Madagascar's national network of LMMAs. Today we have more than 200 LMMAs. Our vision: Marine and coastal resources are managed sustainably for the well-being of LMMA communities and their future generations. Our mission: To support the networking of LMMA communities for the long-term management of marine areas through capacity building, welfare

enhancement, advocacy, and effective sharing of experiences.

In this video, narrated in our Indigenous Malagasy language with English subtitles, we share best practices we have learned so far on our LMMA journey.

MIHARI and Solofo Nandrianina Ralaimihoatra. 2022. Locally Managed Marine Areas (LMMAs) in Madagascar: Best Practices. *Parks Stewardship Forum* 38(2): 355–356.

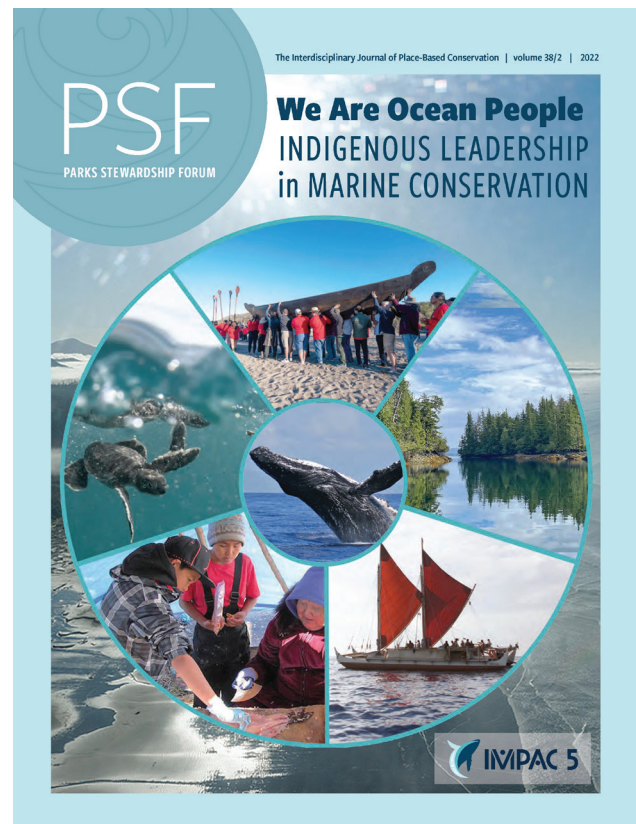

Parks Stewardship Forum explores innovative thinking and offers enduring perspectives on critical issues of place-based heritage management and stewardship. Interdisciplinary in nature, the journal gathers insights from all fields related to parks, protected/conserved areas, cultural sites, and other place-based forms of conservation. The scope of the journal is international. It is dedicated to the legacy of **George Meléndez Wright**, a graduate of UC Berkeley and pioneer in conservation of national parks.

Parks Stewardship Forum is published online at <https://escholarship.org/uc/psf> through **eScholarship**, an open-access publishing platform subsidized by the University of California and managed by the California Digital Library. Open-access publishing serves the missions of the IPPB and GWS to share, freely and broadly, research and knowledge produced by and for those who manage parks, protected areas, and cultural sites throughout the world. A version of *Parks Stewardship Forum* designed for online reading is also available at <https://parks.berkeley.edu/psf>. For information about publishing in PSF, write to psf@georgewright.org.

Parks Stewardship Forum is distributed under a Creative Commons Attribution-NonCommercial 4.0 International License (CC BY-NC 4.0).

The journal continues *The George Wright Forum*, published 1981–2018 by the George Wright Society.

PSF is designed by Laurie Frasier • lauriefrasier.com
